Important Information

WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPARATUS TO RAIN OR MOISTURE.

The lightning flash with arrowhead symbol, within an equilateral triangle is intended to alert the user to the presence of uninsulated

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and

"Note to CATV system installer: This reminder is provided to call the CATV system installer's attention to Article 820-40 of the National Electrical Code that provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the

This product utilizes tin-lead solder, and fluorescent lamp containing a small amount of mercury. Disposal of these materials may be regulated due to environmental considerations. For disposal or recycling information, please contact your local authorities or the Electronic Industries Alliance: www.eia.org

FCC STATEMENT

FCC Notice

LCD TV: A CLASS B digital device

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

FCC CAUTION:

Pursuant to 47CFR, Part 15.21 of the FCC rules, any changes or modifications to this monitor not expressly approved by the manufacturer could cause harmful interference and would void the user's authority to

WARNING: This is a CLASS B product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate

Important Safety Precautions

Electrical energy can perform many useful functions, but it can also cause personal injuries and property damage if improperly handled. This product has been engineered and manufactured with the highest priority on safety. But **IMPROPER USE CAN RESULT IN POTENTIAL ELECTRICAL SHOCK OR FIRE HAZARD**. In order to prevent potential danger, please observe the following instructions when installing, operating and cleaning the product. To ensure your safety and prolong the service life of your LCD TV product,

5. Do not use this apparatus near water---for example, near a bathtub, washbowl, kitchen sink, or laundry tub, in a wet basement, or near a swimming pool, and the like.

Do not use immediately after moving from a low temperature to high temperature environment, as this causes condensation, which may result in fire, electric shock, or other hazards.

Apparatus shall not be exposed to dripping or splashing and no

6. Clean only with dry cloth---Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol

7. Ventilation---Do not block any ventilation openings. Install in accordance with the manufacturer instructions. The vents and other openings in the cabinet are designed for ventilation. Do not cover or block these vents and openings since insufficient ventilation can cause overheating and/or shorten the life of the product. Do not place the product on a bed, sofa, rug or other similar surface, since they can block ventilation openings. This product is not designed for built-in installation; do not place the

8. Heat sources---Do not install near any heat sources such as

9. Grounding or Polarization---Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the

10. Power cord protection---Protect the power cord from being walked on or pinched particularly at

11. Attachments---Only use attachments/accessories specified by the manufacturer. Do not use

Important Safety Precautions (continued)

12. Stand---Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. Do not place the product on an unstable trolley, stand, tripod or table. Placing the product on an unstable base can cause the product to fall, resulting in serious personal injuries as well as damage to the product. When mounting the

13. Move Carefully---When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over. Sudden stops,

14. Lightning---Unplug this apparatus during lightning storms or when unused for long periods of time.

For added protection for this television equipment during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna. This will prevent

15. Servicing---Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled

16. Replacement parts---In case the product needs replacement parts, make sure that the service person uses

17. Overloading---Do not overload wall outlets, extension cords, or convenience receptacles on other

18. Entering of objects and liquids---Never insert an object into the product through vents or openings. High voltage flows in the product, and inserting an object can cause electric shock and/or short internal

19. Damage requiring service---If any of the following conditions occurs, unplug the power cord from the AC outlet, and request a qualified service person to perform repairs.

- a. When the power cord or plug is damaged.
- b. When a liquid is spilled on the product or when objects have fallen into the product.
- c. When the product has been exposed to rain or water.
- d. When the product does not operate properly as described in the operating instructions.

Do not touch the controls other than those described in the operating instructions. Improper adjustment of controls not described in the instructions can cause damage, which often requires extensive adjustment work by a qualified technician.

- e. If the product has been dropped or the cabinet has been damaged in any way.
- f. When the product displays an abnormal condition or exhibits a distinct change in performance. Any

20. Safety checks---Upon completion of service or repair work, request the service technician to perform

21. Wall or ceiling mounting---When mounting the product on a wall or ceiling, be sure to install the

Important Safety Precautions (continued)

22. Power source---This product is intended to be supplied by a listed power supply indicated on the marking label. If you are not sure of the type of power supply to your home, consult your product dealer or local power company. For added protection for this product during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the cable system. This will prevent damage to the product due to lightning and power line surges. When the unit has to be used with another power supply voltage, the power cable must be changed. Consult your product dealer. The socket outlet should be installed near the equipment and easily accessible. Use

23. Panel protection---The LCD panel used in this product is made of glass. Therefore, it can break when the product is dropped or impacted upon by

- If an outside antenna is connected to the television equipment, be sure the antenna system is grounded so as to provide some protection against voltage surges and built-up static charges. Section 810 of the National Electrical Code provides information with respect to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna-discharge unit, connection to grounding electrodes, and

EXAMPLE OF ANTENNA GROUNDING AS PER

- An outside antenna system should not be located in the vicinity of overhead power lines or other electric light or power circuits, or where it can collide with such power lines or circuits. When installing an outside antenna system, extreme care should be taken to keep from touching such power lines or circuits, as contact with them might be fatal.

Preparations

Using the Remote Control

- Use the remote control by pointing it towards the remote sensor window of the set. Objects between the remote control and sensor window may

Note: This illustration is for reference only. The remote sensor may be in

Cautions regarding use of remote control

- Do not expose the remote control to shock. In addition, do not expose the remote control to liquids, and do not place in an area with high humidity.
- Do not install or place the remote control under direct sunlight. The heat may cause deformation of
- The remote control may not work properly if the remote sensor window of the main unit is under direct sunlight or strong lighting. In such a case, change the angle of the lighting or LCD TV set, or operate the remote control closer to the remote sensor window.

Batteries for the Remote Control

If the remote control fails to operate the LCD TV functions, replace the batteries in the remote.

1 Open the battery

2 Insert two size-AAA

- (Place the batteries with their terminals corresponding to the (+) and (-) indications in the

3 Replace the

Improper use of batteries can result in a leakage of chemicals and/or explosion. Be sure to follow the instructions below.

- Place batteries with their terminals corresponding to the (+) and (-) indications.
- Different types of batteries have different characteristics. Do not mix batteries of different types.
- Do not mix old and new batteries. Mixing old and new batteries can shorten the life of new batteries and/or cause old batteries to leak chemicals.
- Remove batteries as soon as they are non-operable. Chemicals that leak from batteries can cause a rash. If chemical leakage is found, wipe with a cloth.
- The batteries supplied with the product may have a shorter life expectancy due to storage conditions.

Power Connection

1. Connecting the female plug to the AC socket on the unit.
2. Connecting the male plug to the wall outlet as illustrated.

Note:

- This illustration is for reference only. The AC plug may be different on different models.
- This product should be operated only from the type of power source indicated on the marking label.

Antenna Connection

CABLE TV (CATV) CONNECTION

A 75-ohm coaxial cable connector is built into the set for easy hookup. When connecting the 75-ohm coaxial cable to the set, screw the 75-ohm cable to the ANT. Terminal.

Some cable TV companies offer "premium pay channels". Since the signals of these premium pay channels are scrambled, a cable TV converter/descrambler is generally provided to the subscriber by the cable TV company.

This converter/descrambler is necessary for normal viewing of the scrambled channels. For more specific instructions on installing cable TV, consult your cable TV company. One possible method of utilizing the converter/descrambler provided by your cable TV company is explained below. Please

"A" position on the RF switch (not supplied) : You can view all unscrambled channels by using the TV's channel keys.

"B" position on the RF switch (not supplied) : You can view the scrambled channels via the

ANTENNAS

The antenna requirements for good color television reception are more important than those for black & white television reception. For this reason, a good quality outdoor antenna is strongly recommended. The following is a brief explanation of the type of connections that are provided with the various

1. A 75-ohm system is generally a round cable with F-type connector that can easily be attached to a terminal without tools (not supplied).
2. A 300-ohm system is a flat "twin-lead" cable that can be

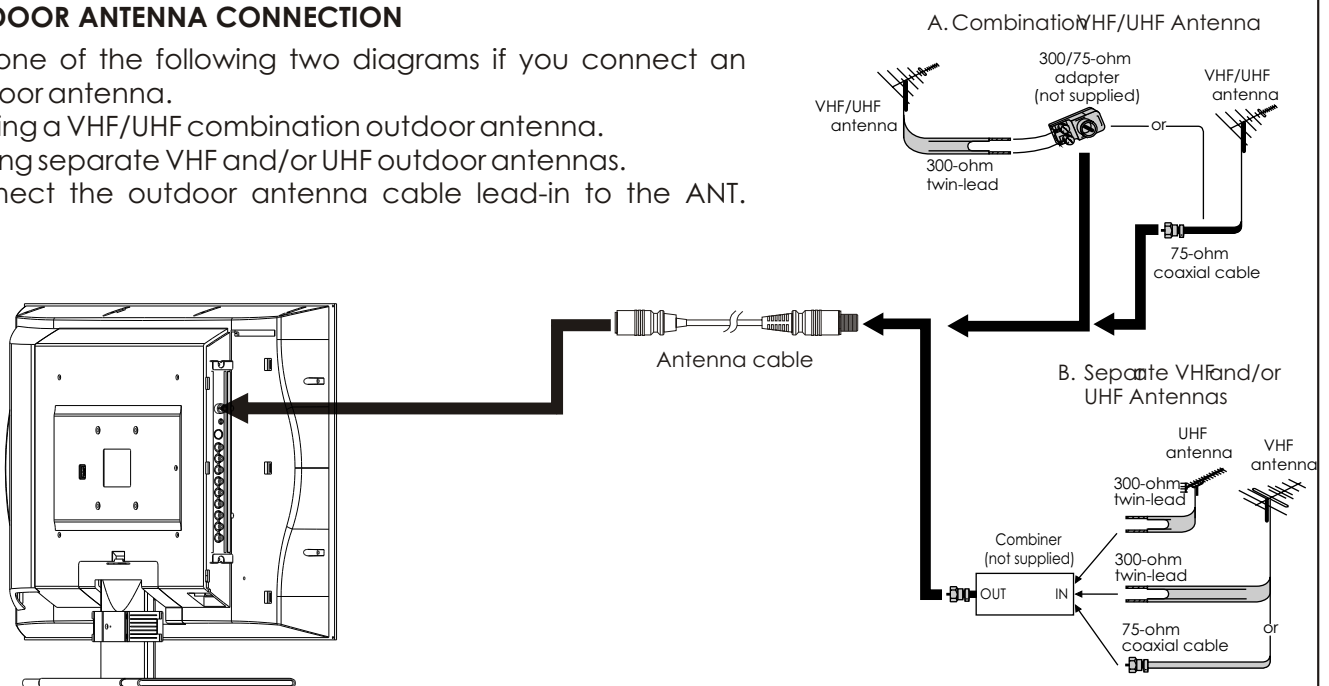

OUTDOOR ANTENNA CONNECTION

Use one of the following two diagrams if you connect an outdoor antenna.

A: Using a VHF/UHF combination outdoor antenna.

B: Using separate VHF and/or UHF outdoor antennas.

Connect the outdoor antenna cable lead-in to the ANT.

Off → 5 minutes → 10 minutes → 15 minutes → 30 minutes

Setting Audio Mode

Press the **Stereo** button repeatedly to select the audio mode between

Choose **STEREO** for channels that are broadcasting in stereo.

Choose **MONO** for channels that are broadcasting in mono, or if you are having difficulty receiving a

Freezing the Picture

Press the **Still** button to hold on the image on the screen (the video

Note:

The freeze function works in TV, Video or S-video mode only.

Viewing Closed Captions

The unit decodes and displays the closed captions that are broadcast with certain TV shows. These captions are usually subtitles for the hearing impaired or foreign language translations. All VCRs record the closed caption signal from television programs, so home-recorded video tapes also provide closed captions. Most prerecorded commercial video tapes provide closed captions as well. Check for the

Note:

The Caption feature does not work with YPbPr, VGA, DVI.

Turning Closed Caption On or Off

- 4

Setting Closed Caption

- 1
- 2
- 3
- 4
- 5

You may select between CC-1, CC-2, CC-3, CC-4, T-1, T-2, T-3 and T-4.

The Closed Caption broadcasts can be viewed in two modes: CAPTION and TEXT. For each mode, four channels are available.

The [CAPTION] mode shows subtitles of dialogues and commentaries of TV dramas and news programs while allowing a clear view of the picture.

The [TEXT] mode displays various information over the picture (such as TV program schedule, weather forecast, etc.) that is independent of the TV programs.

Adjusting Child Lock Settings

Child Lock

This function allows TV programs to be restricted and TV usage to be controlled based on FCC data. It prevents children from watching violent or sexual scenes that may be harmful.

Restriction of TV programs includes two ratings that contain information about the program: the MPAA rating and the TV Parental Guidelines. The MPAA rating is restricted by age. TV Parental Guidelines are restricted by age and content.

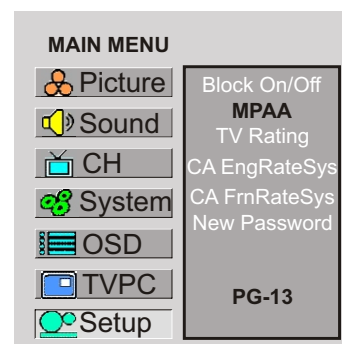

[1] Movie Rating (MPAA)

Rating		
age based	G	GENERAL AUDIENCES. All ages admitted.
	PG	PARENTAL GUIDANCE SUGGESTED. Some material may not be suitable for children.
	PG-13	PARENTAL STRONGLY CAUTIONED. Some material may be inappropriate for children under
	R	13.
	NC-17	RESTRICTED. Under 17 requires accompanying parent or adult guardian.
	X	NO ONE 17 AND UNDER ADMITTED.
	N/A	X Rating is an older rating that is unified with NC-17 but may be encoded in the data of

Note:

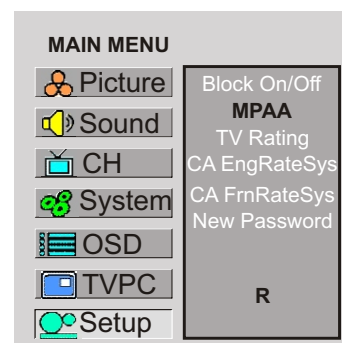

Example 1:

"PG-13" in the age-based rating is blocked, this will automatically block the higher ratings "R", "NC-17", "X" also.

Example 2:

"R" in the age-based rating is blocked, this will automatically block the higher rating "NC-17", "X" also.

"Child Lock Block" with a green screen will be displayed if you watch

Adjusting Child Lock Settings (continued)

[2] TV Rating

Rating		← content based →				
		D	L	S	V	FV
age based	TV-Y (All children)	X	X	X	X	X
	TV-Y7 (Direct to Older Children)	X	X	X	X	●
	TV-G (General Audience)	X	X	X	X	
	TV-PG (Parental Guidance Suggested)	●	●	●	●	
	TV-14 (Parents Strongly Caution)		●	●	●	
	TV-MA (Mature Audience Only)					

X — Content Rating can be set but this Rating is not normally broadcast by TV Station.

● — Content Rating can be set.

D: Sexually Suggestive Dialog

L: Adult Language

S: Sexual Situation

V: Violence

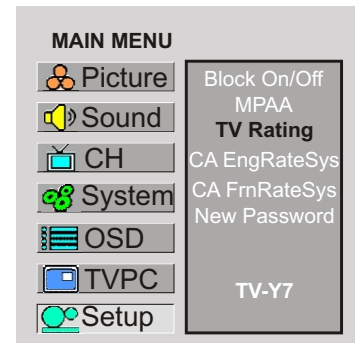

FV: Fantasy Violence

Note:

Age-based ratings can be modified by the content-based ratings but only in the combinations

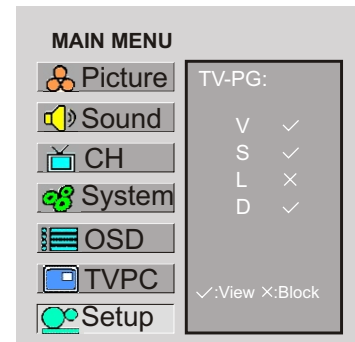

Example 1:

When TV-Y7 in the age-based rating is set to BLOCK, this will automatically block the higher ratings: TV-G, TV-PG, TV-14 and TV-MA. In addition, D, L, S, V and FV in content are automatically blocked.

Example 2:

When TV-14 in the age-based rating is set to BLOCK, this will automatically block the higher ratings: TV-MA. In addition, if you block "L" sub-rating in TV-PG, then the D, L, S, V and FV in content

"Child Lock Block" with a green screen will be displayed if you watch

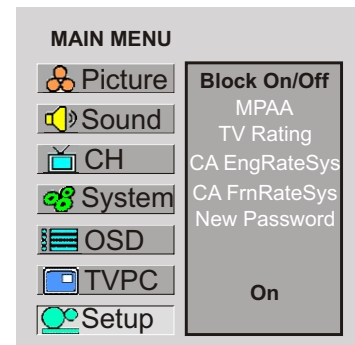

Adjusting Child Lock Settings (continued)

Turning Child Lock On or Off

- 1
- 2
- 3
- 4

The default password is 1234, you can change the password by yourself.

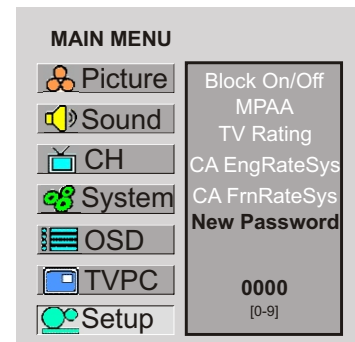

The unit allows you to access the Child Lock menu if you input the right password, or

- 5

Changing the Password

- 1 From the password menu page, press **CH+/-** repeatedly to select **New**
- 2 Input a new 4-digit password. For example, you may set "0000" as your new password.
- 3 Be sure to write down your password and retain it for future use.

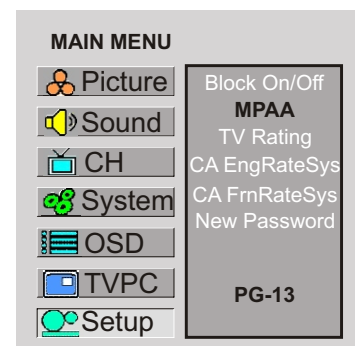

Adjusting the Movie Rating

- 1
- 2

For example, "PG-13" in the age-based rating is selected, this will automatically block the higher ratings "R", "NC-17", "X" also.

- 3

Adjusting the TV Rating

- 1
- 2

This will automatically block the higher age-based ratings. You may set the individual content-based ratings as follow.

C8+	Programming generally considered acceptable for children 8 years and over. No profanity, nudity or sexual content.
G	General programming, suitable for all audiences.
PG	Parental Guidance suggested. Some material may not be suitable for children.
14+	Programming contains themes or content which may not be suitable for viewers under the age of 14. Parents are strongly cautioned to exercise discretion in permitting viewing
18+	Intended for viewers 18 years and older and might contain depictions of violence.

Adjusting Canadian French Rating

- 1 From the **Child Lock** menu page, press **CH+/-** repeatedly to select **CA**
- 2
- 3

CANADIAN FRENCH RATING CHART

E	Exempt - Exempt
G	General - Programming intended for audience of all ages. Contains no violence, or the violence content is minimal or is depicted appropriately.
8 ANS+	8+ General - Not recommended for young children. Programming intended for a broad audience but contains light or occasional violence. Adult supervision
13 ANS+	Programming may not be suitable for children under the age of 13 - Contains either a few violent scenes or one or more sufficiently violent scenes to affect them. Adult
16 ANS+	Programming may not be suitable for children under the age of 16 - Contains frequent scenes of violence or intense violence.
18 ANS+	Only for adult viewing. Could contain frequent violent scenes and extreme violence.

Before calling for repair service, check the following items for possible remedies to the

Symptoms	Check item
"Ghost" or double images	✍ This may be caused by obstruction to the antenna due to high rise buildings or hills. Using a highly directional antenna may
No power	✍ Check that the AC power cord is plugged into the mains socket. ✍ Unplug the power cord, wait for 60 seconds. Then re-insert plug
No picture	✍ Check antenna connections at the rear of the unit to see if it is properly connected to the unit. ✍ Possible broadcast station trouble. Try another channel. ✍ Adjust the contrast and brightness settings. ✍ Check the Closed Captions control. Some TEXT modes could block the screen. ✍ Select a correct input. ✍ Is a non-compatible signal being input?
Good picture but no sound	✍ Increase the VOLUME. ✍ Check that the unit is not muted. ✍ Check that the Speaker item in SOUND menu is set to ON.
Good sound but poor color	• Adjust the contrast, color and brightness
Poor picture	✍ Sometimes, poor picture quality occurs when having activated an S-VHS camera or camcorder connected and having connected another peripheral at the same time. In this case, switch off one of the other peripherals.
Horizontal dotted line	✍ This may be caused by electrical interference (e.g. hairdryer, nearby neon lights, etc.). ✍ Turn off the equipment.
Television not responding to remote control	✍ Check whether the batteries are working. Replace if necessary. ✍ Clean the remote control sensor lens on the unit. ✍ Do not use the remote control under strong or fluorescent
Snowy picture and noise	✍ Check the antenna connection.
No stable or not synchronized VGA picture	✍ Check if you have selected the correct VGA mode in your
No output from one of the speakers	✍ Adjust Balance in the SOUND menu.
Control buttons do not work	✍ Unplug the power cord, wait for some seconds. Then re-plug the power cord and turn on the unit again.

Do not use in hot or cold rooms (locations)

- When the unit is used in rooms (locations) with low temperature, the picture may leave trails or appear slightly delayed. This is not a malfunction, and the unit will recover when the temperature returns to normal.
- Do not leave the unit in a hot or cold location. Also, do not leave the unit in a location exposed to direct sunlight or near a heater, as this may cause the cabinet to deform and the LCD panel

Note:

If your problem is not solved, turn your unit off and then on again once.

Care and Maintenance

LCD Display panel information

Important Information Regarding Use of Video Games, Computers, Captions or Other Fixed Image Displays.

The extended use of fixed image program material can cause a permanent "shadow image" on the LCD panel.

This background image is viewable on normal programs in the form of a stationary fixed image. This type of irreversible LCD panel deterioration can be limited by observing the following steps:

A. Reduce the brightness/contrast setting to a minimum viewing level.

Note:

The marking or retained image on the LCD panel resulting from fixed image use is not an operating

Cleaning and Maintenance

To clean this unit, wipe with a soft, dry cloth.

If the surfaces are extremely dirty, use a soft cloth dipped in a soap and water solution or a weak detergent solution.

- Use eyeglass cleaner to remove stubborn dirt from the LCD.
- Never use alcohol, paint thinner or benzine to clean this unit.
- Before using a chemically treated cloth, read the instructions that came with the cloth carefully.
